

RESELLER PORTAL

Introduction:

The **Reseller Module** in the SaaS Management Platform enables authorized partners to manage and distribute the platform's services to their own set of clients. It provides a secure, multi-tenant environment where resellers can onboard clients, monitor usage, manage subscriptions, and track software deployments.

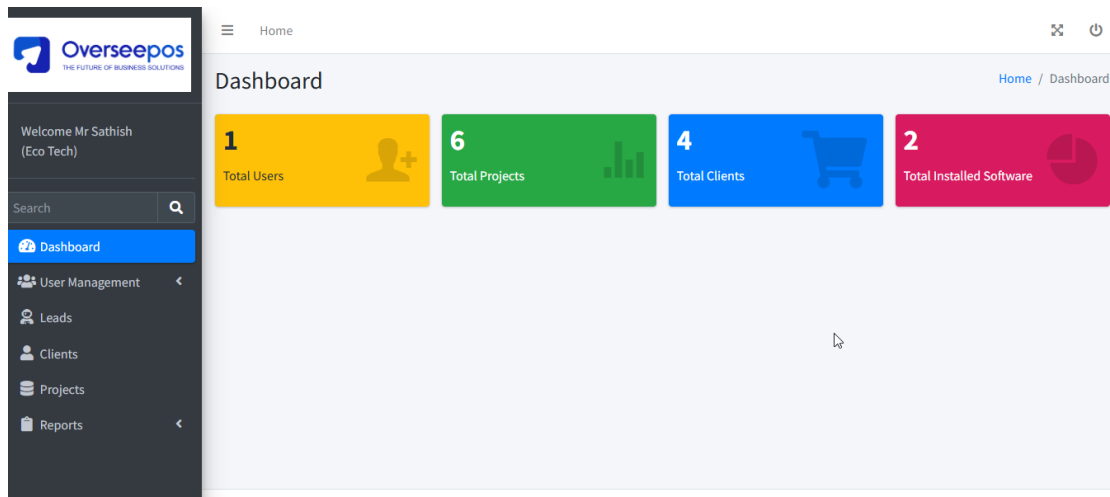

Login:

STEP 1: The **Login Page** is the entry point for users to access their SaaS accounts securely using their credentials (email and password).

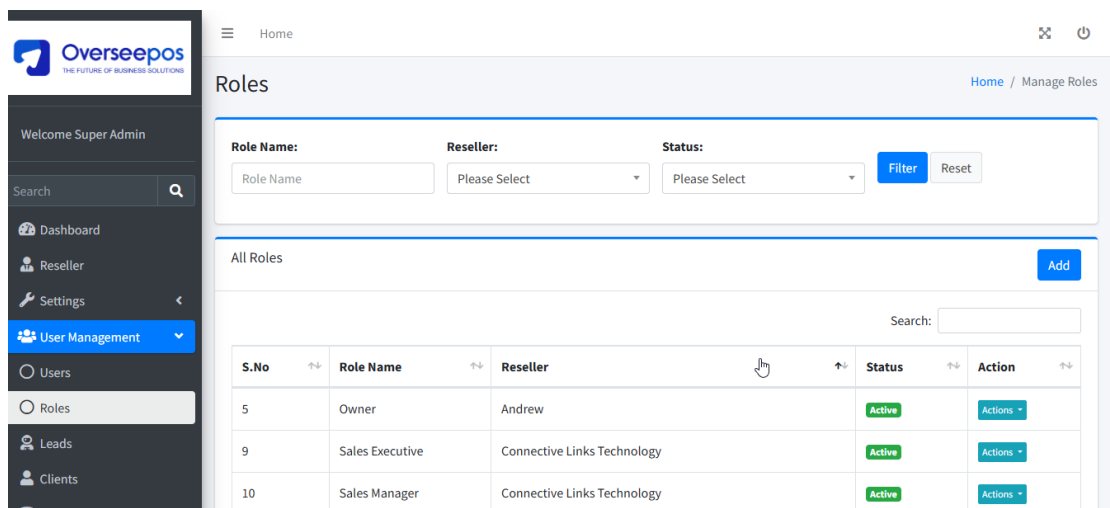

Dashboard:

STEP 2: A reseller login dashboard in a SaaS platform gives resellers a simple view to manage their business. It displays key stats: **total users, projects, clients, and installed software** for all their customers, making it easy for resellers and their clients to understand account activity.

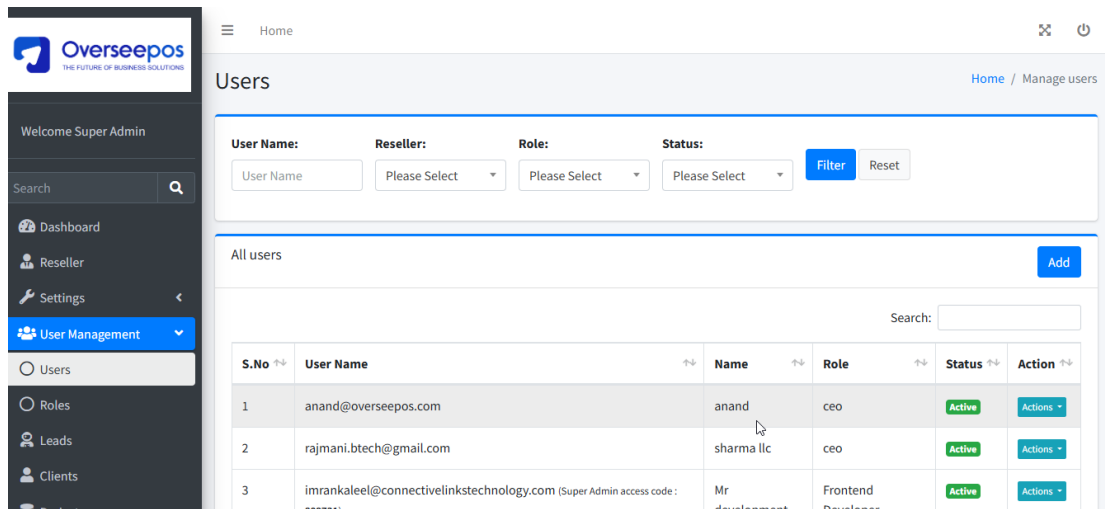

User And Role Management:

STEP 3: In the navigation menu (often labeled as **User Management**), click on **“Roles”**. This page displays all existing roles and allows you to create, edit, or delete roles.

STEP 4: In the navigation menu (often labeled as **User Management**), click on **“Users”**. The **User Management** section lets you view, add, edit, or delete users in the system. You can assign roles like **Reseller**, **Client**, or **Admin** to control what each user can access.

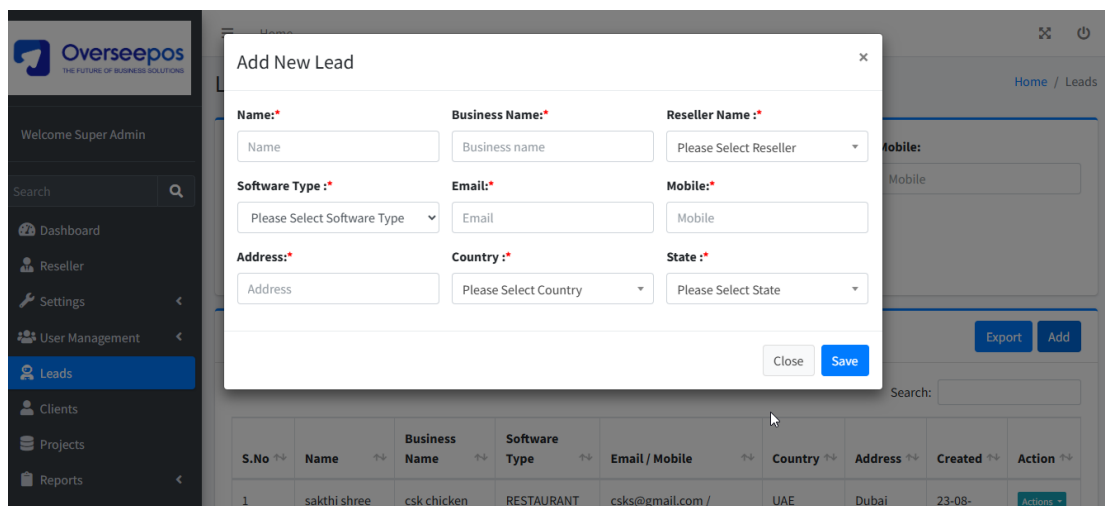

Lead Management:

STEP 5: The **Lead Management** section helps you track and manage potential clients (leads). You can add new leads, assign them to resellers.

✓ Below is a list of predefined software types that resellers can select when adding or managing a lead:

- Restaurant React
- Restaurant Lite
- Restaurant Advance

STEP 6: On the right side of the lead row, you'll see a button or icon labeled **"Make Client"**. Click it to start the conversion process.

S.No	Name	Business Name	Software Type	Email / Mobile	Country	Address	Created	Action
1	test	test	RESTAURANT REACT	test@gmail.com / 789456132	UAE	dubai	25-08-2025	Actions
2	test	test	RESTAURANT REACT	test@gmail.com / 789456132	UAE	dubai	25-08-2025	Actions
3	Suthagar	Padaiveedu	RESTAURANT LITE	sathishsharma.cud@gmail.com / 895645784552	UAE	Dubai Main Road	09-08-2025	Edit Delete Make as Client

Clients:

STEP 7: Go to the "Clients" Section. From the left menu or top navigation, click "Clients". Find the "Add" button. Click it to open the client creation form. The client will be added to your list.

Add New Clients

Client Name: Client Business Name: Reseller Name:

Client Email: Client Mobile: Client Address:

Country: State: Status: Active InActive

S.No	ID	Client Name	Client Business Name	Status	Created Date	Action
1	CL010	development	development	Active	22-08-2025	Actions

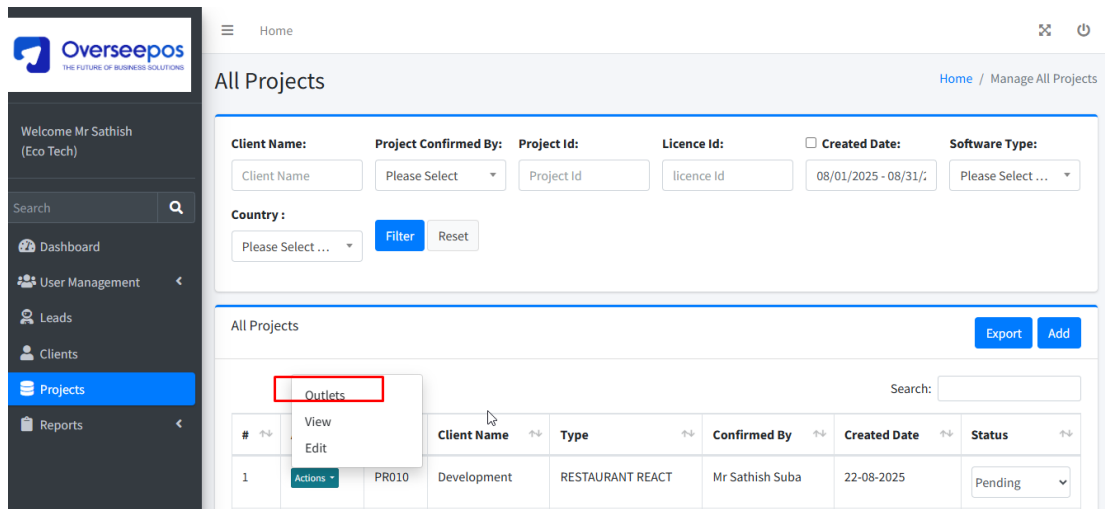

Projects:

STEP 8: From the sidebar menu, click on "Projects". Here, you will see all the projects related to your clients.

STEP 9: From the left menu or top navigation, click “Projects”. Find the “Add” button. Click it to open the project creation form. The project will be added to your list.

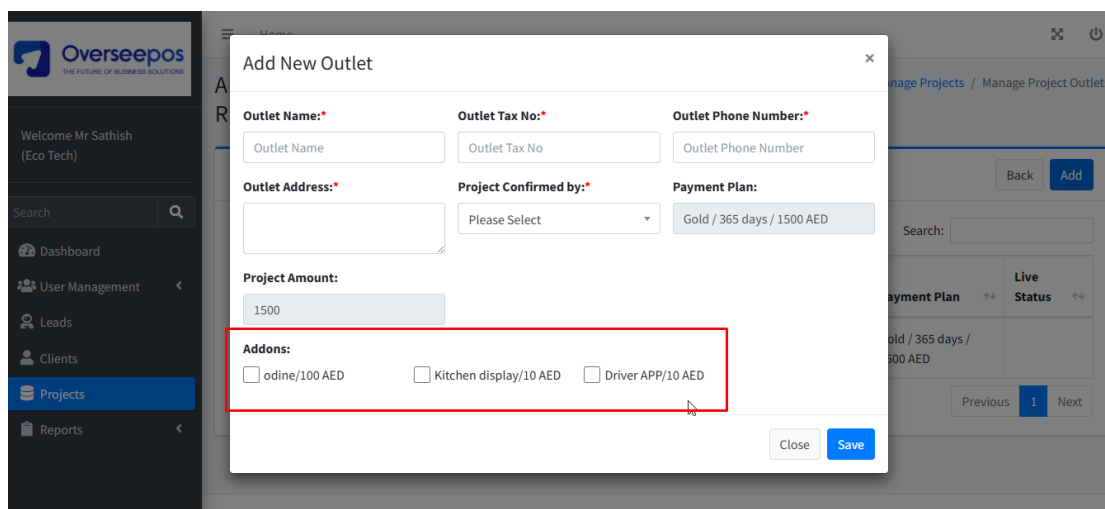

Outlets:

STEP 10: Inside the project details page, locate the field labeled “Outlet”. Click on the outlet dropdown menu.

Addons:

STEP 11: Inside the outlet detail page, look for a section labeled “Addons”. Check the boxes next to the add-ons you want to assign to this outlet.

Install Software:

STEP 12: Inside the outlet details page, find the “Install Software” option.
